DETAILED ACTION

1. This is in response to amendment filed August 26, 2003. The Office acknowledges the cancellation of claims 20-40. Newly added claims 41-86 are presented for examination.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

- I. Claims 20-40, drawn to an apparatus receiving requests via satellite and transmitting packets via high speed data cable, classified in class 709, subclass 219.
- II. Claims 41-86, drawn to a driver for use in a computing device having a TCP/IP stack, classified in class 709, subclass 236.

The inventions are distinct, each from the other because of the following reasons:

1. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as lacking a receiving unit connectable to a satellite dish. See MPEP § 806.05(d).
2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

4. Since applicant has received an action on the merits for the originally presented invention, this invention has been *constructive elected by original presentation for prosecution on the merits*. **Accordingly, claims 41-86 are withdrawn from consideration as being directed to a non-elected invention.** See 37 C.F.R 35 § 1.142(b) and M.P.E.P. § 821.03.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joseph E. Avellino whose telephone number is (703) 305-7855. The examiner can normally be reached on Monday-Friday 7:00-4:00.
